

## Say-IT Product Sheet

**Say-IT** is SeayCo Integrators, Inc. new custom voice recognition software solution. Initially developed for our liquor industry customers, **Say-IT** provides interactive voice picking for order fulfillment. **Say-IT** is teamed with SeayCo's **Load-IT** wave building solution, allowing for unlimited database access to direct voice picks based on real-time knowledge of carton contents.

SeayCo Integrators, based in Conyers, Georgia, has been developing custom software and controls solutions for the material handling industry since 1992. Our new voice directed software solution offers the customer flexibility and greater efficiencies by streamlining the command process.

### Key **Say-IT** Benefits:

- Allows for faster, more accurate picking **and** provides verification of pick accuracy
- Offers alternatives – by integrating the use of finger scanners, the user can alternate between scanning and voice to suit each situation
- Proven voice interface using Vocollect® voice recognition hardware and software
- Solution is based on SeayCo's experience in the liquor industry and teamed with proven Load-IT wave building system

### Additional Benefits:

- Assigns pickers to pick zones based on location
- Communicates to the picker when pick inconsistencies occur
- Automatically activates emergency replenishment requests
- Allows for repeat of commands
- Allows for picker to verbally reassign carton
- System can be trained to recognize specific users voice patterns

### Supported Environment:

- Any host systems
- RF/ WiFi scanners
- Bar code printers
- Finger scanners, hand held scanners and PDAs
- MS Windows Server 2003
- MS SQL Server 2000 / 2005
